

# Stack Box Positioner

**Improves the efficiency and safety of operators working with totes, junior containers, shelving and stock carts.**

**While eliminating wasted motion and improving ergonomics.**

Dollies used to transport stacks of containers can be rolled on and off the adjustable width forks. They can then be raised or lowered to the best height to allow the operator to load and unload parts with a minimum of lifting, bending, stretching, or reaching. The unit is so compact it requires little more floor space than the containers, and the low 38" mast is well below the line of sight of standing or seated workers.

Capacities up to 1000 lbs. and lift height is adjustable up to 26" by foot switch or hand control.

Available in Hydraulic and Pneumatic, Oil Free Models

## Specifications

Capacity:	1000 lbs. uniformly distributed load
Overall Dimensions:	35-3/4"L x 28"W (33" including lags) x 38"H
Vertical Travel:	26 inches
Lowered Height:	21/2" (at forks)
Rise Time:	7 seconds
Lowering Time:	Adjustable
Forks:	21/2"H x 26"L Fork width: Adjustable from 81/2" to 263/4" outside to outside
Power Unit:	Electric or Pneumatic
